Netvue IPTV Channel Selector

The Netvue IPTV Channel Selector was developed to provide a solution for companies wanting to view IPTV channels on both Apple Mac and PC computer desktops.

Features

- Simple one click channel selection by channel logo
- Web browser based so appears virtually identical on Macs and PCs
- Uses VLC freeware media player engine for Mac and PC compatibility
- Can be customised and branded with client logo and name

Available from Netvue – www.netvue.co.uk
