

ENCODEDMEDIA Video Publisher

Video Publisher makes recording and broadcasting to any size audience as easy as sending email. The interface is easy for a novice to operate, yet powerful enough to help the most experienced user. Video Publisher will synchronise visual aids such as Microsoft PowerPoint slides, provide statistics of live viewers, and automatically publish the content afterwards.

The software is lightweight enough to run on a standard desktop PC or laptop, and with a simple DV camera any

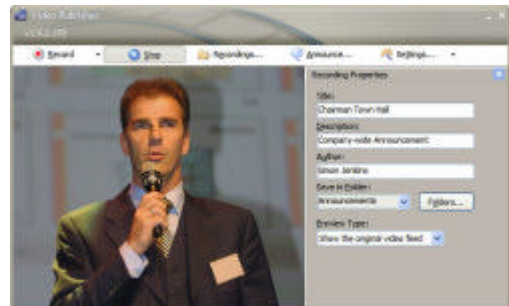

office can be an instant TV studio.

Video Publisher records to disk and supports both multicast and unicast for video broadcasts. Recorded content can be sent to any web server. Alternatively, for larger Internet-based audiences, content can be uploaded to a third party hosting company such as Akamai or Speedera.

Live and recorded video can be watched via the companies Intranet or Internet site-there's no need to install specialised client software. Communicate company news, corporate initiatives and quarterly results faster and cheaper with no need to involve your IT department.

Uses for Video Publisher include townhall meetings, corporate announcements, compliance training, department meetings, product launches and employee induction.

Video Publisher creates a communication link between you and your employees, partners and customers to provide fast access to important information that's both engaging and informative.
