## IPTV from Netvue at Uncle

IPTV is the convergence of television distribution with IT data network infrastructure. IPTV has rapidly become the industry standard for TV and audio-visual distribution around buildings.

Uncle is a new London post-production company that opened in a newly refurbished building in late 2007 as part of The Farm Group.

Netvue supplied Uncle with a full IPTV system, from aerial, satellite dish and IPTV head-end all the way through to the set-top boxes that enable TV displays to receive and display the video streams. Their IPTV system distributes internally produced video as well as broadcast TV.

## Netvue's IPTV expertise

Netvue specialises in IPTV and Video on Demand systems, with the addition of Digital Signage where desired as an enhancement to the IPTV channels. By concentrating on just these technologies we have built-up great expertise in this field.

We have the skills and the experience to specify, design and install the right IPTV system for your company, and one that will serve your business reliably for years to come.

Edit suites at Uncle use IPTV from the IT network to feed the client TV's

## Benefits of IPTV

- IPTV uses the existing computer network - no new cables, no hassle!
- Digital picture quality - immune from noise, distortion and signal loss
- Remote IPTV system management using a web browser
- Unlimited channels with controlled user access
- TV available from any network point throughout the business
- Television delivered direct to PC and Mac desktops on the IT network
- Supports: HD (high definition); auto 16:9 and 4:3 aspect ratio switching
- Integration with Video on Demand and Digital Signage equipment
- Easy future additions and expansion
