

Press release:

DCD Media installs Netvue IPTV System

DCD Media plc, the TV production and distribution business has installed a business IPTV system from IPTV specialist Netvue. The system at DCD Media's new offices in central London provides a choice of Freeview channels, Sky satellite channels and a DVD feed, all distributed using Exterity IPTV equipment on the DCD ethernet computer network.

"We are a television business, so it makes sense to have television in our offices" commented Derek Nelson, Interim Chief Operating Officer at DCD Media. "Netvue's system gave us the advantage of television on our computer desktops and the ability to put display screens anywhere in the building without the need for extra cabling".

The TV channels are displayed on LCD displays in the reception area and meeting rooms, and on PC and Mac desktops across the company.

Netvue provided DCD Media with an end-to-end solution; from the rooftop reception equipment and Exterity IPTV encoders, to Netvue's IPTV channel selector application

on the computers. Netvue can be visited at www.netvue.co.uk
